

Sizing Chart for Guitar

Guitar Brand and Model:

Please provide measurements in inches. We recommend taking measurements with your guitar laying on a table.

- _____ **A** Total length (without strap button)
- _____ **B** Body length (without strap button)
- _____ **C** Width of headstock (including tuning machines)
- _____ **D** Width of upper bout
- _____ **E** How far is this from the bottom of the guitar?
- _____ **F** Width of lower bout
- _____ **G** How far is this from the bottom of the guitar?
- _____ **H** How from the bottom is the bridge?

Additional measurements (not pictured)

- _____ How far from the bottom is the balance point? The easiest way to find the balance point is to slide your hand under the guitar. The center of balance tells us where to put the handles.
- _____ How thick are the ribs at the bottom of the guitar?
- _____ How thick is the guitar at the bridge? Measure top of the table to the top of the bridge.
- _____ Measure the height of the nut. With the top of the headstock touching the table, measure from the top of the table to the top of the nut.

Please choose material and color choice:
